## DETAILED ACTION

### *Election/Restrictions*

Applicant's election with traverse of Group I (claims 46-65) in the reply filed on February 17, 2005, is acknowledged. The traversal is on the ground(s) that all of the claims are sufficiently related that a thorough search of one group would naturally encompass the search for the other group. This is not found persuasive because there are numerous search areas for the method claims that are not required for the apparatus claims.

The requirement is still deemed proper and is therefore made FINAL.

Claims 66 and 67 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

### *Double Patenting*

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

**Claims 47 and 57 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 23, respectively, of prior U.S. Patent No. 6,325,435. This is a double patenting rejection.**

Art Unit: 3726

The following nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

**Claims 46, 48-56, and 58-65 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1, 3, 4, 11-15, 23, 24, 28-30, 37, and 39-41 of U.S. Patent No. 6,325,435.** Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the patent "anticipate" the application claims. Accordingly, the application claims are not patentably distinct from the patent claims. Since it is clear that the more specific patent claims encompass the application claims, following the rationale in *In re Goodman* cited in the preceding paragraph, where applicant has once been granted a patent containing a claim for the specific or narrower invention, applicant may not then obtain a second patent with a claim for the generic or broader invention without first submitting an appropriate terminal disclaimer.

The claims correspond as set forth below:

Application Claim	Patent Claim
46	1
48	2

49	3
50	4
51	12

63	39
64	40
65	41

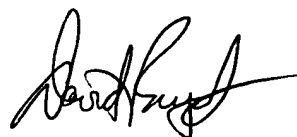

**Applicant is advised that should claim 48 be found allowable, claim 56 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof.** When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).
